# CONCEPT AND ARCHITECTURE

## Gensler

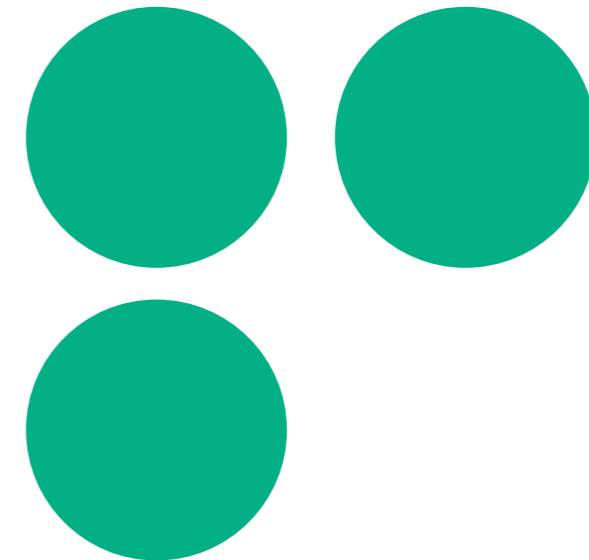

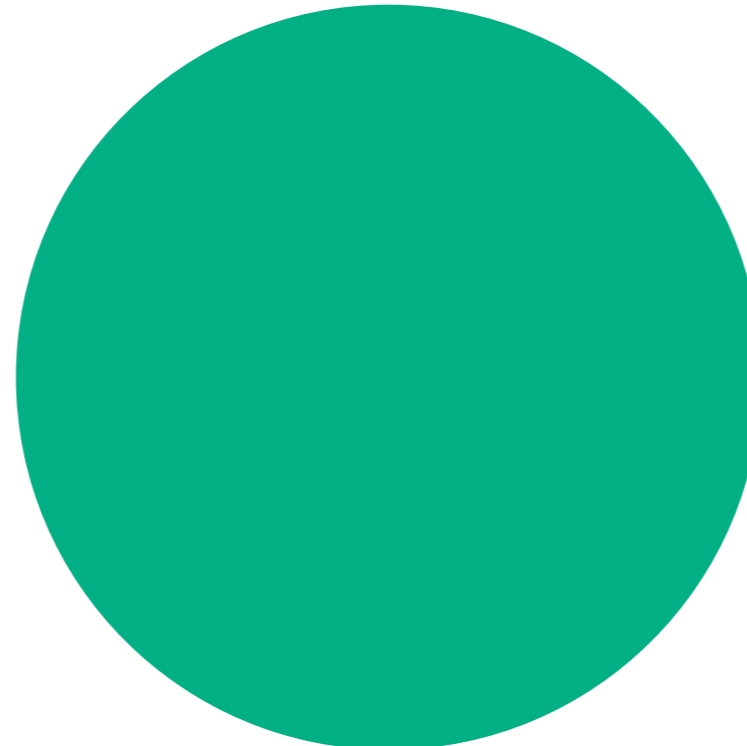

Gensler is a leading global architecture, interiors, planning and strategic consulting firm that partners with companies and institutions to achieve measurable results through the use of design. For over 50 years, Gensler has been a pioneer in creating great places that enhance the quality of work and life.

Founded in San Francisco in 1965, today Gensler employs more than 5,000 professionals in 44 cities around the globe. The firm has over 2,700 active clients in virtually every industry and delivers projects at every scale.

Gensler is ranked #1 for architectural services in BD Magazine's World Architecture Top 100. Gensler was also the only firm to rank in the top 5 largest and top 5 most admired firms.

Orenda's engaging architectural designs bring a historical and an original essence, enabling a range of engagement with nature. The intention was not only to create spaces for residential use, but for general facilities and activities, forming social and cultural network that promote a distinct district for the wider community.

The design principles and drivers of this district are based on the experience of residents, where they can relax, enjoy, socialize and retreat back to. Such principles have been achieved through pedestrian-only courtyards, connectivity, privacy, access, colored themes and optimum views.

## ORENDA'S LIFESTYLE

### FACILITIES AND AMENITIES

Designed to enrich your living experience, Orenda is unique rather than uniform. The variety of shops are boutique, while others are independent; serving various needs and preferences.

It is a quaint; yet, a picturesque setting. Orenda is a convenient, sustainable and enjoyable place to live, shop, workout and dine.

Orenda is a buzzing district, home to charming boutiques and sensational bakeries, delis and restaurants. It is the place where you truly experience pretty pedestrianized streets and where the European charm harmonizes with contemporary style.
